

## Schedule for Supervised Driving

Remember, the purpose of supervised practice driving is to advance teen's competence in safe driving by exposing them to varying driving situations & having any driver errors identified & corrected before they become unsafe habits. Also remember, Montana requires all teens to get 50 hours of supervised practice driving (at least 10 hours at night). If each supervised practice driving session lasts about 30 minutes, & you can complete 2 supervised practice sessions each week, then it will take you 50 weeks or about 12 months to complete them all. You should log supervised practice time so you can keep track. Teens will show the most improvement during the first 12 months & 2000 miles of driving.

Date	Conditions & Skills (e.g., night driving, turns)	Amount of Time	Initials
List the date. You can also list the time you started the supervised driving session.	Write in the "goals" for each supervised practice driving session. The goals should include (1) the driving conditions (e.g., daytime, clear weather, type of road, route taken) & (2) the Safe Driving Behaviors (from the list on Keep Track of Driver Progress handout)	Write in how much time each supervised practice driving session was (e.g., 30 minutes).	Both parent & teen need to initial after the session is complete.

<sup>\*</sup> Contact your teen's driver education instructor if you would like more of these handouts to keep track of supervised practice driving
